Sprint Goals Writeup

The goals for our upcoming sprint include adding more search options, such as being able to search for a book by its genre. Another goal is to add user registration functionality, and to create user tiers, like regular users and librarians. This way librarians can have access to features that we don't want regular users to have. We want to be able to restrict access to our Librarian Access page to librarians so that regular users cannot view the page. Our final goal is to give librarians the ability to add information about authors.
